CONCRETE
COLOUR
SYSTEMS

For many years now, the popularity of the Stencil Pave finish has flourished throughout Australia.

Home and property owners alike are drawn to the system for its great practicality and ability to enhance the exterior design of any house or commercial area.

Made from the one solid slab of concrete (with the colour/s and design added at the time of laying the slab), the Stencil Pave system will not sag, sink or host an army of ants. "Weeding" the driveway on the weekend is also a forgotten chore!

With its grouted and rustic surface, the Stencil Pave finish provides a flat and sure footing for pedestrian and vehicular traffic.

Colour longevity is also assured due to the tough UV resistant pigments and resins that are used in the products.

With the assistance of your applicator, choose the colours and designs that will beautify and enhance your outdoor environment and enjoy the elegance of Stencil Pave.

THE CCS COLOUR RANGE

CCS SANDY BEIGE

CCS ALMOND

CCS CHARCOAL

CCS BLACK

CCS STORM GREY

Important: We recommend that you use our actual colour sample chips to make your final colour selection.

DESIGN AND BROCHURE LIMITATIONS

Stencil Pave is created by hand, on site under varying weather and job conditions. By nature it is of a rustic appearance and consequently small variations in colour, texture and geometric precision are likely to occur. For people unfamiliar with the finished product, we recommend that you view jobs already completed by your decorative concreter to gain an understanding of the appearance. Although all efforts have been taken to accurately reproduce colours, limitations of the printing process will cause colours depicted in this guide to vary from the actual job. No reproduction without written permission from Concrete Colour Systems.
